Register Number	192324244

Q1. Execute and Display the Results of Commands in Kali Linux

AIM

To execute and display the results of the **rm**, **users**, and **tree** commands in the Kali Linux operating system.

PROCEDURE

1. **Open the Kali Linux Terminal** and access the command-line interface to execute the required Linux commands.
2. **Create a sample file** named test.txt using the touch command and use the ls command to verify that the file has been created successfully.
3. **Remove the sample file** using the rm test.txt command and execute ls again to confirm that the file has been deleted.
4. **Execute the users command** to display the usernames of all users who are currently logged into the Kali Linux system.
5. **Execute the tree command** to display the files and directories available in the current location in a hierarchical tree-like structure.
6. **Observe and verify the outputs** displayed by the rm, users, and tree commands and ensure that each command performs its intended operation without errors.
7. **Capture screenshots of the terminal output** and record the observed results as evidence of the successful execution of all the required commands.

COMMANDS USED

touch test.txt

ls

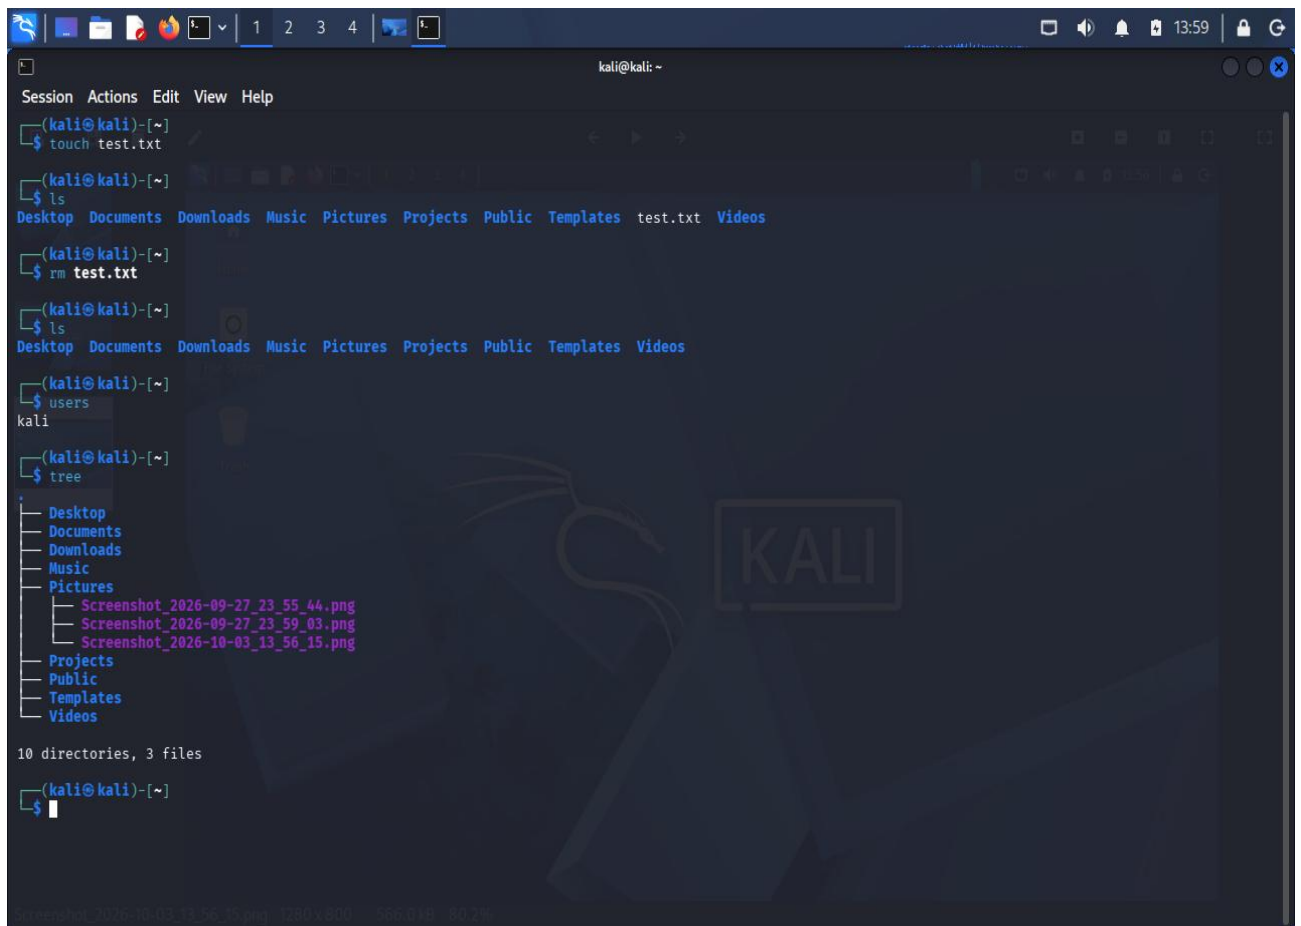

rm test.txt

ls

users

tree

OUTPUT

```
kali@kali: ~  
Session Actions Edit View Help  
(kali@kali)-[~]  
$ touch test.txt  
(kali@kali)-[~]  
$ ls  
Desktop Documents Downloads Music Pictures Projects Public Templates test.txt Videos  
(kali@kali)-[~]  
$ rm test.txt  
(kali@kali)-[~]  
$ ls  
Desktop Documents Downloads Music Pictures Projects Public Templates Videos  
(kali@kali)-[~]  
$ users  
kali  
(kali@kali)-[~]  
$ tree

$
```

RESULT

The **rm**, **users**, and **tree** commands were successfully executed in Kali Linux. The **rm** command removed the specified file, the **users** command displayed the currently logged-in user, and the **tree** command displayed the directory structure in a hierarchical format.
