Q2. Execute and Display the Results of less, more, and vi Commands in Kali Linux

AIM

To execute and display the results of the **less**, **more**, and **vi** commands in the Kali Linux operating system and understand their basic functions.

PROCEDURE

1. Open the Kali Linux Terminal and navigate to the home directory where the required sample file can be created and accessed.
2. Create a sample text file containing multiple lines of text using the echo command. This file will be used to demonstrate the less and more commands.
3. Execute the less command followed by the file name to open and view the contents of the file. Use the Arrow keys or Page Up/Page Down to move through the contents and press q to exit.
4. Execute the more command followed by the file name to display the contents page by page. Press Spacebar to move to the next page and q to exit the command.
5. Execute the vi command followed by the file name to open the file in the Vi text editor. The file contents can be viewed or edited using Vi commands.
6. Observe and verify the output of all three commands and understand that less and more are used for viewing text, while vi is used for viewing and editing files.
7. Capture screenshots of the terminal showing the execution and output of the less, more, and vi commands and record the results as evidence.

COMMANDS TO EXECUTE

First create a sample file:

```
echo -e "This is Kali Linux.\nThis is a sample text file.\nLinux commands are executed in the terminal.\nThe less command displays text page by page.\nThe more command also displays text page by page.\nThe vi command is used to view and edit files." > sample.txt
```

Then execute:

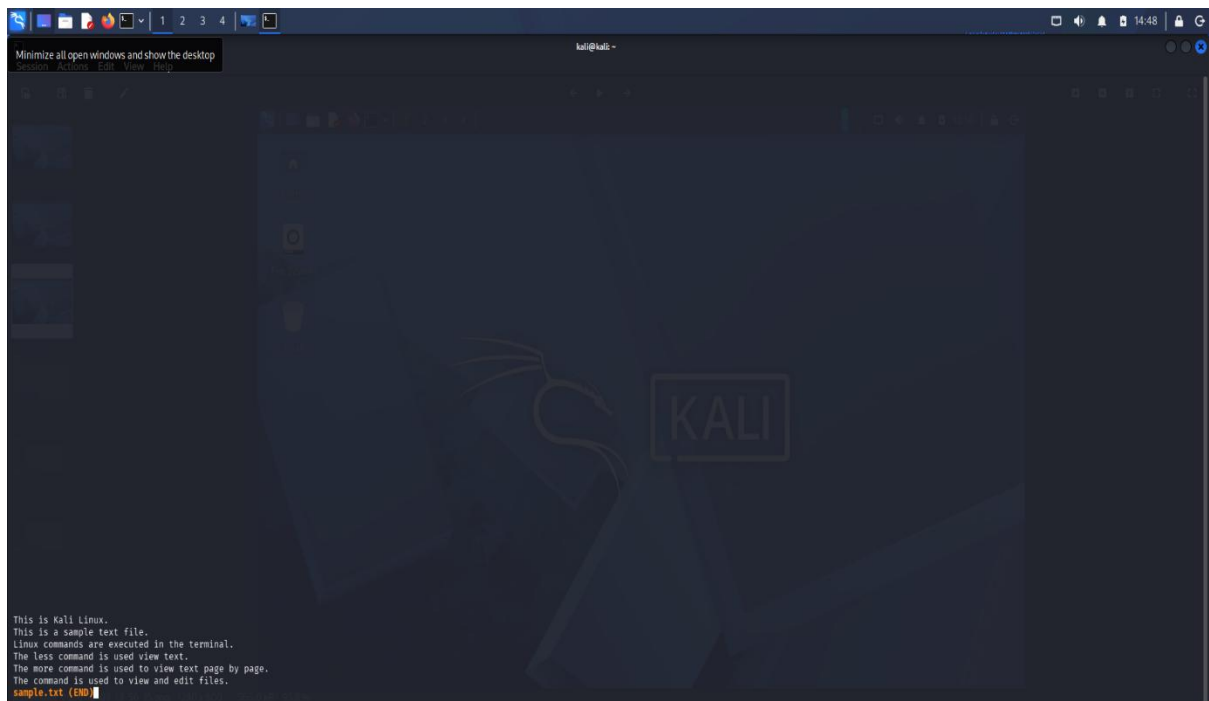

1. less Command

The less command is used to **view the contents of a text file page by page**.

```
less sample.txt
```

To exit the less command: Press q.

OUTPUT:

2. more Command

The more command is used to **display the contents of a text file one screen at a time**.

```
more sample.txt
```

To exit the more command: Press q.

OUTPUT:

```
(kali@kali)-[~]
$ more sample.txt
This is Kali Linux.
This is a sample text file.
Linux commands are executed in the terminal.
The less command is used view text.
The more command is used to view text page by page.
The command is used to view and edit files.

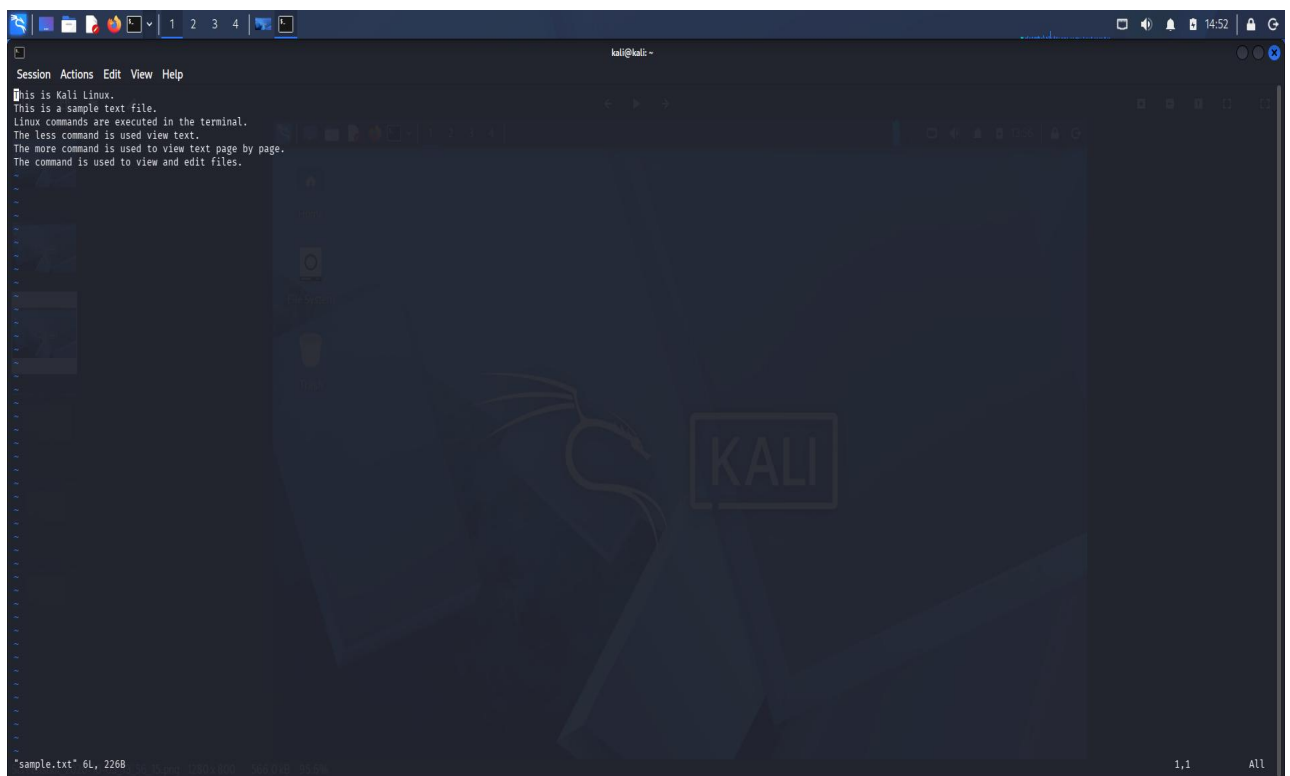

(kali@kali)-[~]
$
```

3. vi Command

The vi command is used to **open, view, and edit a text file** in the Vi text editor.

vi sample.txt

OUTPUT:

RESULT

The **less**, **more**, and **vi** commands were successfully executed in Kali Linux. The less and more commands were used to view the contents of a text file, while the vi command was used to open and edit the file using the Vi text editor.
