LAB EXPERIMENT - 06

Q6. Execute and Display the Results of Touch, Pwd, and Wget Commands in Kali Linux

Department	AIDS
Course Code / Course Name	ITA1409 - ETHICAL HACKING
Name	B KIRTHANAA
Register Number	192324244

AIM

To execute and display the results of the touch, pwd, and wget commands in the Kali Linux operating system and understand their basic functions.

PROCEDURE

1. Open the Kali Linux Terminal and navigate to the home directory.
2. Execute the touch command to create a new empty file.
3. Execute the pwd command to display the present working directory.
4. Execute the wget command followed by a URL to download a file from the internet.
5. Use the ls command to verify the created and downloaded files.
6. Observe and verify the output of all three commands and understand their functions.
7. Capture screenshots of the terminal showing the execution and output of the commands as evidence.

COMMANDS TO EXECUTE

First, open the terminal and move to the home directory:

```
cd ~
```

Then execute:

1. Touch Command

The touch command is used to create a new empty file or update the timestamp of an existing file.

OUTPUT:

2. Pwd Command

The pwd command is used to display the full path of the present working directory.

OUTPUT:

3. Wget Command

The wget command is used to download files from the internet using HTTP, HTTPS, or FTP protocols.

OUTPUT:

SUMMARY OF COMMANDS

Command	Syntax	Function
touch	touch sample.txt	Creates an empty file or updates its timestamp
pwd	pwd	Prints the full path of the current directory
wget	wget https://example.com/index.html	Downloads a file from a web server

RESULT

The touch, pwd, and wget commands were successfully executed in Kali Linux. The touch command was used to create an empty file, the pwd command was used to display the current working directory, and the wget command was used to download a file from the internet.
